PAINE'S CELERY COMPOUND

The Best Remedy in the World---It Makes People Well.

There is one frue specific for diseases arising from impure blood and a debilitated nervoid extent, and that is Faine's celery compound, so generally prescribed by physicians. It is probably the most remarkable remedy that the scientific research of the country has produced. Prof. Edward E. Phelps, M. D., Li.D., of Dartmouth College, first prescribed what is now known the world over as Palie's celery compound, a positive cure for dyspep-da, bilinosaces, liver complaint; neuralgia, thematism, all nervous diseases and kidney troubles. For the latter, Poine's celery gost pound has succeeded again and again where everything else has failed.

London, Feb. 11. In the House of Commons to-day Sir William Hardoudt, otheredisor of the scheduler in the late ministry and leader of the opposition in the House, said that he had never in all his experience met such ciritical circuastances as those with which they were now confronted. It was in the highest degree desirable, he said, that the misunderstanding between Great Britain and the United States over the Moarge Doctrine should be removed in both countries at the earliest possible moment. The government of the United States had expressed a desiru to co-operate in a friendly solution of the dispute between Great Britain and Venezuela and he was rejoiced to see in the speech from the chrone that the prospect was welcomed. The only practical question remaining was whisther in the Venezuelan difficulty thereighed been any invasion of the rights was whether in the venezation united by there had been any invasion of the rights of the United States, as upon that point no pronouncement had been made by the United States government. gard to the obligations of England under the terms of the treaty of Berlin were absolutely incorrect.

The whole point taken into consideration was that the pownra signatory to the treaty should see to it that the correct into elect. The Cyprus convelution laid special obligation upon England and such an expression of imputency as that conveyed by the statement made by the premier has never before been made by a British minister. Wes this, he asked, peace and honor? Lord Rosebery declared that the notion of the government regarding Armenia was most raysterious. He felt forced to believe, he said, that the government had decided to abandon the cause of the Armeniaus, and that Lard Salisbury was prepared to repudiate the utterances made in his speeches at Brighton and in the Gulidball.

As regards Venezuela, Lord Rosebury maintained that the sending of Maxim guns to British Guinna hed not a little to do with cauring the standards, that further explanations would, he made without delay as to, what negotiations were proceeding between England and Venezuela.

The Revenue Bill. According to the present understanding the Senate will vote on the free comage substitute for the revenue bill to-day There seems to le no doubt that the substitute will be defeated as it is becoming evident to the most persistent silver man that the tactics now employed are well calculated to disgus the people with the whole subject. When it comes to action on the original revenue bill, however, the result is uncertain with the chances as the situation stands to-day rather against the bill. It is said that the first move on the part of the Democrats will be an attempt to lay the matter on the table and thus avoid a direct vote on the adoption of the bill. If the Populists and Democrats combine in support of this motion it will be carried by a majority of one vote even if every Republican Sepator supports the measure which it is now supposed they will do. If the motion fails then there will follow a long denate and Senator Hill threatens to use fillbustering tection against the measure. The only hope for the bill, apparently, is that some of the Populist members will support it, but it.

Populist members will support it, but it is now 'impossible to say what their action will be.

Salt Rheum Case.

THOMAS WYANT, 365 Monroe Street, Brooklyn, N. Y. writes:

November 27, 1895 "SALVA-CRA Is the best friend I

have had for six years. Having been a sufferer for that length of time with Salt Rheum, and after trying almost every remedy known, without getting any relief, I tried a box of SALVA-CRA, and can honestly say ! was cured before using the entire box."

In advertising SALVA-CEA we mention nothing but facts. We do not say it will do things that it will not do, and the public appreciate this.

It is the best remedy for piles, ulcerations, old sores, skin irritation, chilblains, colds, and masal catarrh.

Lyon recommendation of the Joint Standing Committee on Streets and Highways, the petition of the Hampien and Wintercort Railway Co asking permission to locate its tracks and operate its cars upon certain streets of the city has been referred to the City Solitite for an opinion upon the question of authority of the City Council to gran tor an opinion upon the question of authority of the City Council to gran the rights select for by the pentitioner. The petition and the accompanying report of the committee pre ent but one question for determination and that is whether the City Council has the power to authorize the Hampden and witterport Railway to under ite exiting endorrent in use it e public streets of the city for the purposes of constructing and operating a street railroad. The question raised by he petition and report, is not a new one. It has been fully discussed in the cases, and by text book writers and certain rights have been sostained which theirly selfine the powers of a city or town to pe mit the use of the public streets and highways for street railway purposes. The powers of a municipal corporation to control its streets and highways are vested in the public, and these powers cannot be delegated to the contraction of the propertices.

a municipal corporation to control its streets and highways are vested in the public, and these powers cannot be delegated to any person or corporation except by a valid legislative grant.

It is a well established principle in the absence of constitutional provisions that unless the Legislature confers upon a municipal corporation the lower to grant to street railway companies the right to lay tracks, erect poles and string vines upon and over its streets such corporation has no right to authorize the case of its streets for such purpo es. The cile was early sustained by the English courts, that any interference with the public streets, which does not fall within what may be called the or dinary incidents and rights pertaining to the use of the streets by the public is never exercised except under the author ity of Acts of Parliament conferring special powers. And this rule has been deleting to receive the report as them the city council to hold a secural meeting to receive the report as the public, and these more conferring at the pumping station, of a capacity in the lakes freezy over a steamboat lands the entry and so constructed as to admit of eular gement at any time.

Judge Dillon, in his work upon Municipal Corporations, commenting upon a judgment of the court in an early leading case in New York, upon this subject says. The judgment of the court rears upon the sound principle that the pwers of a corporation in respect to the court of its streets, are held in trust for the public becent, and cannot, unless clearly an horized by a valid legistary enertment, be surrerdered or delegat if the vontract, to private parties, either corporate or natural."

Judge Redfield, in a report to the Massichusetts. Egislature, defining the rights and incrests of street railways, says. "All public entsembles in the highways, can only be created by legislative grant."

(thef Justice Shaw, in a leading case in Massachusetts upon this subject, says. "All public entsembles or accommodations intended for the common and general benefit, whatever may be their nature and character, are under the control and regulation of the legislature exercising the towering a power of the State."

The exact question raised by the petition and report, perhaps has never been directly before the Supreme Court of the State of Malire, but the court has indirectly sent in a late case, where another question was under consideration, that the legislature and the city confeil can imits of municipal corporations ?

Chapter 268 of the Public Laws of 1893 is a general statute regulating the organization and control of street rail roads section 6 of that act, which confers upon municipal corporations the power to regulate the location of street railways, was amended in 1895, chapter 84 of the Public Laws, and the ameanment confers upon the Municipal officers all the authority they powess, to regulate the location of street railwask in the several cities and towns. The act provides for an appeal to the Supreme Judicial Court, in case the Municipal officers neglece, or refuse to approve a route and location. Whether this general statute applies to a corporation organized under a special charter, its not now necessary to determine, because section 2 of the amendatory act, provides that the act shall not apply to street railway corporations in cities of afficent housand or more inhubitants. The general law, this meither delegates authority to the city council, nor confers upon the municipal officers any power to grant fran chases to street railway companies. The charter of the Hampleen and Winterport Rai way Company, was granted in 1833, private sand special uws, chapter 6.38 giving to certain persons names in the charter and their associates, successors and assigns the authority to construct, maintain and opprate a street railway, in and through the towns of finanched whiterport, Frankfort and Prospect, but giving them no authority whatever to construct or operate a street railway, in and through the town of the charter was amended in 1895, private and freight to locate their railway under support the grant of the given that town handed, subject of the approval of the municipal officers of the respective towns.
